DETAILED ACTION

Allowable Subject Matter

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: prior art, U.S. Patents # 6,121,839 and # 6,218,900 B1 does not teach nor render obvious a class-AB output stage for an operational amplifier that has, in combination with other limitations, a second biased class-AB control circuit including a second pair of complementary control transistors, the second control circuit being connected in series between the second differential signal line and the second current source; and pair of differential amplifiers, each differential amplifier having first and second inputs and a current output, the respective outputs of the differential amplifiers being connected to a feedback signal line, the first inputs of the differential amplifiers being connected to respective gates of the first output transistors, wherein the first control circuit connected between the respective first inputs of the differential amplifiers and the second control circuit is connected between the respective second inputs of the differential amplifiers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Prior art, U.S. Patents # 6,121,839, # 6,218,900 B1, # 6,366,169 B1, # 5,621,357, and # 4,419,631 contain some limitations of the claimed invention.
